

K-Love Radio is such a positive source of encouragement in an increasingly negative world. I often listen to 106.7 FM for more 6 hours per day. People tell me how much they love K-Love and that it is the only radio station in this area that provides the uplifting music they need. It would be devastating to this area if an LPFM station that provided other type programming were to interfere or prevent our being able to hear K-Love. It is essential to the public good that the type of programming that K-Love provides be allowed to continue. Since Sept. 11, 2001, our country has struggled to recover from that tragedy. People need encouragement. They need spiritual nourishment. They need a positive influence in the face of the negatives we face every day. The people of this country and of my local area need K-Love.
